Tripod Setup Instructions

1. Remove three leg pins, unfold legs and replace leg pins to lock into place.

2. Slip guy wire ring over mast extension.

3. Remove mast pin, raise mast, locate hole for pin and replace.

4. Remove center pin near base of tripod, insert pin through spring and clamp assembly and replace.

5. Loosen turnbuckles and clip carabineers to eyehooks on base of tripod legs. Tighten turnbuckles in clockwise direction until guy wire is taut.

6. Screw stake into ground beneath center of tripod.

7. Open clamp, hook chain on clamp in tightest position, close clamp.

8. For added stability in high wind locations, place a sandbag or cinder block on each foot.
